Re: Victim's Statement for Press, *State v. Kaliq Mansor*, Washington County Case C111376CR

Mr. Mansor had nine long years to take responsibility for Bryan's horrific, senseless murder. Instead of choosing to do the right thing, he has taken every possible opportunity to avoid owning up to what he has done. His blatant refusal to be held accountable for his crimes illustrates his innate cruelty, and his callous indifference towards my sons.

Over the last nine years, Mr. Mansor has deliberately gone out of his way to inflict as much pain and suffering on my family as possible. This has included relentless attacks on my reputation, as well as his family's continued efforts to intimidate and bully me in a pathetic attempt to deflect from the sickening truth.

While I'm grateful that this gut-wrenching phase of the legal process is over, I don't believe for one second that Mr. Mansor's motives are anything but selfish. In private, I suspect he will still maintain his innocence to his family, saying that he had no choice but to fall on his imaginary sword in an effort to "protect" me and my son. The truth is that Mr. Mansor wanted to end HIS suffering, not my family's. He did not have a change of heart, nor has he shown any remorse - he simply wants this to be done.

The aftermath of Bryan's murder will never be over for my family. Justice has been delayed for an excruciating nine years. But tonight, when I look up to the heavens, I am comforted to know that my precious Bryan can at long last rest in peace.

Angela Foster
